DETAILED ACTION

Status of Claims

Claims 1-24 are currently pending in the application.

Receipt is acknowledged of amendment / response filed on July 30, 2004 and that has been entered.

Claims 3-6, and 13-24 are withdrawn from further consideration pursuant to 37 C.F.R. 1.142 (b) as being drawn to a non-elected subject matter.

Information Disclosure Statement

Receipt is acknowledged of Information Disclosure Statement (IDS), filed on 05/27/2004, which has been entered in the file.

Response to Election/Restriction

In response to the restriction requirement, Applicants have elected Group I, which includes claims 1, 2 and 7-12 drawn to a compound of formula I, and elected the species found in claim 12 (Remarks, on page 2) with traverse is acknowledged. The traversal is on the ground(s) that all the pending claims should be rejoined and examined with the elected Group I because a search and examination of the entire application can be made "without serious burden" on the Examiner.

The Examiner respectfully disagrees with the Applicants because the products of Invention groups I-VI differ materially in structure and in element from each other and therefore, are capable of supporting their own patents. The invention groups I-VI are related to a set of structurally diverse compounds, and their methods of making (chemical structures, which are similar, are presumed to function similarly, whereas chemical structures that are not similar are

Art Unit: 1626

not presumed to function similarly), which do not possess a substantial common core wherein a reference anticipating one would not necessarily render the other obvious and to search all the above groups in a single application would be an undue burden on the Examiner. Because of the plethora of classes and subclasses in each of the Group, a separate search considerations are involved, which would impose a serious burden on the Examiner to perform a complete search of the defined areas if unrestricted. Also the fields of search are not coextensive. The wide disparity among the groups requires that many divergent fields must be searched, including all classes and subclasses of U.S. and foreign patents as well as journals and publications. Moreover, the Examiner must perform a commercial database search on the subject matter of each group in addition to a paper search, which is quite burdensome to the Examiner. For these reasons, Applicant's arguments are found unpersuasive and, therefore, the requirement for restriction and election of species is still deemed proper and is therefore made FINAL.

Applicants preserve their right to file a divisional on the non-elected subject matter.

As set forth in the restriction requirement and an election of a single compound (or set of compounds), the invention will encompass all compounds that fall within the scope of the claim is as follows:

A compound having the formula I wherein:

R¹ is as claimed except "hydrogen, and optionally substituted heteroaryl",

R² is as claimed except "optionally substituted heteroaryl",

R³ is as claimed,

R⁴ is as claimed,

X is O.

As a result of the election and the corresponding scope of the compound identified, claims 3-6, and 13-24 and the remaining subject matter of claims 1, 2 and 7-12 are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The withdrawn subject matter of claims 3-6, and 13-24 is properly restricted as it differs materially in structure and in element from the elected subject matter supra so as to be patentably distinct there from.

Objections

Claims 1, 2 and 7-12 are objected to for containing non-elected subject matter. The claims should be amended to exclude non-elected subject matter and within the scope of elected compound.

The reference cited on the PTO-892 is included only to show the state of the art.
